

# 2005 Preferred Medication List

## Alphabetical Guide

Effective January 1, 2005 (Revised December 15, 2004)

### About Your Preferred Medication List (PML)

This preferred medication list (also sometimes referred to as a formulary) is a list of medications preferred by your plan. When your doctor prescribes medications from this list, it can help you make the most of your pharmacy plan benefits and control your prescription medication costs.

All the specially selected medications listed have received U.S. Food and Drug Administration (FDA) approval as safe and effective. All medications on this list have been chosen by a committee of physicians and pharmacists.

This list also is available by medication category on our web site: [www.mywhi.com](http://www.mywhi.com)

### How to Use This Medication Categories Guide

Use this Guide to locate brand and generic medication alternatives that may have a lower copayment than non-preferred brand drugs. Share this Guide with your physician, and encourage him or her to authorize a generic alternative for you whenever appropriate.

### Your Three-tier Copayment Plan and the PML

The chart at top right describes the three-tier copayment options your plan provides:

**1<sup>st</sup> tier:** includes less-costly generic medications (listed below in lower-case letters). These medications generally have the lowest copayment.

**2<sup>nd</sup> tier:** includes PREFERRED BRANDS on the PML (listed below in all UPPER-CASE LETTERS). These medications usually fall in the middle copayment tier.

**3<sup>rd</sup> tier:** includes non-preferred brands (not listed on the PML). When a generic version of a brand-name medication becomes available, most brand-name drugs move to the highest copayment tier.

Likewise, if only one generic product is available for a medication, it may be placed on a higher tier. These medications are rarely listed on this Guide since they do not minimize costs as effectively as other medications listed.

THREE-TIER COPAY LEVEL	TYPE OF MEDICATION
1 <sup>st</sup> tier— Lowest Copayment	Most generic medications
2 <sup>nd</sup> tier— Middle Copayment	PREFERRED BRAND medications on the formulary with no generic available
3 <sup>rd</sup> tier— Highest Copayment	Non-preferred brands or brands with a generic available

Copayments and coverage of medications and medication categories can vary by plan. This Guide is meant to be a source of general information about the PML.

### Medications Not Found on This Guide

Due to space limitations, not all medications on the PML could be listed on this Guide. If you are unable to locate your medication on this list, please remember the following:

- Most generic medications are preferred by your plan—usually at the lowest copayment.
- Your medication may have been added to the list after it was printed.

### For More Information About this Guide

This Guide may change to reflect current medication availability and tier placement. You can find the most recent update at [www.mywhi.com](http://www.mywhi.com).

**Walgreens Health Initiatives' online PML Alphabetical Guide is updated regularly—every calendar quarter or more often if needed—to reflect important changes.**

**Please note: This Guide is subject to change without notice. For assistance, please contact Member Services at 1-800-207-2568.**

**Generic medications are listed in lower-case (small) letters and preferred brand medications are listed in UPPER-CASE (CAPITAL) letters.**

All oral antineoplastic, immunosuppressant and HIV medications are on the Formulary, if the medication is FDA approved.
